

Anuman Interactive Launches "Dracula Series" for Download PC

Montreuil, October 7th 2010. Anuman Interactive presents the "Dracula Series" chapters, available for download on PC.

Having successfully adapted the license "Dracula: The Path of The Dragon" for the iPhone and iPad, Anuman Interactive announces the launch of the "Dracula Series" on PC.

Aimed at casual gamers, the story of the **"Dracula Series" is divided in three shorter chapters, which can be played separately.** In this 1st person adventure and investigation game, the player takes on the role of Father Arno Moriani, a priest sent by the Vatican to lead an enquiry in the depths of Transylvania. During the adventure, Father Moriani discovers that fear has a name: Dracula.

Alain Milly, Anuman Interactive's Publishing Manager explains the company's goal for "Dracula Series", "We want to let a wider audience explore the intriguing world of "Dracula" on their computer. The original version, which included a variety of difficult puzzles, was a challenge for hardcore gamers, but could dishearten occasional players. Now, the **"Dracula Series" offers the possibility to those who don't spend as much time on video games the opportunity to access the same rich universe of the original "Dracula" and get immediate pleasure playing it**".

Franck Berrois, producer of the "Dracula Series", adds: "In the age of dematerializing content, dividing the story into three chapters presents an advantage for players. It enables them to download the part of the story that they want to play very quickly"

The three chapters of the "Dracula Series" will be available in **five languages (French, English, Italian, Spanish and German)**, on the main worldwide download platforms (Nexway, Metaboli, Wild Tangent, Big Fish Games, etc.) and on <http://fr-microïds.gamesplanet.com/>.

The **"Dracula Series" chapters** will also be available on PC, exclusively via download, beginning October 6th, 2010.
